

UID EXPERIMENT 9

NAME:SOAMESHWARAN D

ROLL:240701520

AIM:

The aim is to design an Event Registration Form that validates email, phone number, and number of tickets using HTML, CSS, and JavaScript with Validator.js, and displays error messages effectively.

PROCEDURE:

Step 1: Create HTML Form

```
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>Event Registration Form</title>
<link rel="stylesheet" href="style.css">
</head>
<body>

<div class="container">
<form id="myForm">
<h2>Event Registration Form</h2>

<label>Full Name:</label>
<input type="text" id="name" placeholder="Enter your full name">

<label>Email:</label>
<input type="email" id="email" placeholder="Enter your email">
<span id="emailError" class="error"></span>

<label>Phone Number:</label>
<input type="text" id="phone" placeholder="Enter phone number">
<span id="phoneError" class="error"></span>

<label>Select Event:</label>
<select id="event">
<option>Tech Conference</option>
```

```
<option>Workshop</option>
<option>Hackathon</option>
</select>

<label>Number of Tickets:</label>
<input type="number" id="tickets" placeholder="Enter number of tickets"> <span
id="ticketError" class="error"></span>

<button type="submit">Register</button>
</form>
</div>

<script src="https://cdnjs.cloudflare.com/ajax/libs/validator/13.6.0/validator.min.js"></script>
<script src="script.js"></script>

</body>
</html>
```

Step 2: Styling (CSS)

```
body { font-family: Arial,
sans-serif; background:
#f2f2f2; display: flex; justify-
content: center; align-items:
center; height: 100vh;
margin: 0;
}

.container { background: white;
padding: 30px; border-radius: 10px;
width: 450px; box-shadow: 0 0 15px
rgba(0,0,0,0.1);
}

h2 { text-align:
center; color:
#1565c0;
}

form { display: flex;
flex-direction: column;
}

label { margin-top:
10px; font-weight:
bold;
}
```

```
input, select { padding:
10px; margin-top: 5px;
border: 1px solid #ccc;
border-radius: 5px;
}
```

```
button { margin-top:
20px; padding: 12px;
background: #d81b60;
color: white; border:
none; border-radius:
5px; font-weight: bold;
cursor: pointer;
}
```

```
button:hover { background:
#ad1457;
}
```

```
.error { color:
red; font-size:
0.8em;
}
```

Step 3: JavaScript Validation

```
document.getElementById("myForm").addEventListener("submit", function(e) {
e.preventDefault();
```

```
let email = document.getElementById("email").value; let
phone = document.getElementById("phone").value; let
tickets = document.getElementById("tickets").value;
```

```
let emailError = document.getElementById("emailError"); let
phoneError = document.getElementById("phoneError"); let
ticketError = document.getElementById("ticketError");
```

```
emailError.textContent = ""; phoneError.textContent
= ""; ticketError.textContent = "";
```

```
if (!validator.isEmail(email)) { emailError.textContent
= "Please enter a valid email";
}
```

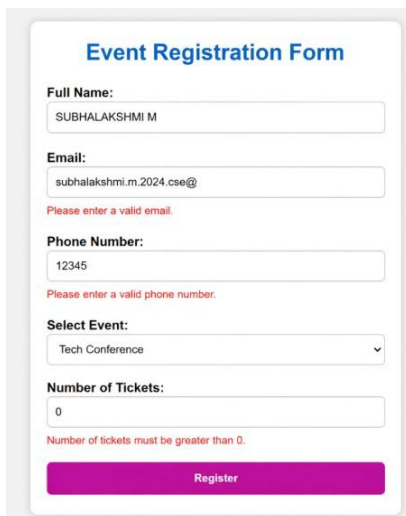

```
if (!validator.isMobilePhone(phone, 'any')) {
phoneError.textContent = "Please enter a valid phone number";
}
```

```
if (tickets <= 0) { ticketError.textContent = "Enter valid
number of tickets";
}
if (
validator.isEmail(email) &&
validator.isMobilePhone(phone, 'any') && tickets
> 0
){
alert("Registration Successful!");
}
});
```

OUTPUT:

For Valid Input:

- Accepts correct email, phone number, and ticket count
- Displays success alert: Registration Successful!

The screenshot shows a web form titled "Event Registration Form". It contains several input fields: "Full Name" with the value "SUBHALAKSHMI M", "Email" with the value "subhalakshmi.m.2024.cse@", "Phone Number" with the value "12345", "Select Event" with a dropdown menu showing "Tech Conference", and "Number of Tickets" with the value "0". Below the "Number of Tickets" field, there is a red error message: "Number of tickets must be greater than 0." At the bottom of the form is a purple "Register" button. A red alert box is visible at the top of the form, displaying the message "Registration Successful!".

For Invalid Email:

- Shows: Please enter a valid email

The image shows a web form titled "Event Registration Form". It contains several input fields: "Full Name:" with the value "SUBHALAKSHMI M", "Email:" with the value "subhalakshmi.m.2024.cserajalakshmi.edu.in", "Select Event:" with a dropdown menu showing "Tech Conference", and "Number of Tickets:" with the value "3". A red error message is displayed above the "Register" button, stating: "Please include an '@' in the email address. 'subhalakshmi.m.2024.cserajalakshmi.edu.in' is missing an '@'." The "Register" button is a solid blue rectangle.

For Invalid Phone:

- Shows: Please enter a valid phone number

The image shows the same "Event Registration Form" but with multiple validation errors. The "Full Name:" field has the value "SUBHALAKSHMI M". The "Email:" field has the value "subhalakshmi.m.2024.cse@" and a red error message below it: "Please enter a valid email." The "Phone Number:" field has the value "12345" and a red error message below it: "Please enter a valid phone number." The "Select Event:" dropdown menu shows "Tech Conference". The "Number of Tickets:" field has the value "0" and a red error message below it: "Number of tickets must be greater than 0." The "Register" button is a solid blue rectangle.

For Invalid Number of Tickets:

- Shows: Enter valid number of tickets

Event Registration Form

Full Name:
SUBHALAKSHMI M 240701539

Email:
subhalakshmi.m.2024.cse@rajalakshmi.edu.in

Phone Number:
9876543210

Select Event:
Tech Conference

Number of Tickets:
e

Please enter a number.

RESULT:

Thus, an Event Registration Form validation system using HTML, CSS, and JavaScript with Validator.js was successfully implemented. The system validates user input efficiently and displays appropriate error messages for invalid entries.
